ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: CONTROLLED-RELEASE PHARMACEUTICAL FORMULATION

(57) Abstract: In the present invention, a new pharmaceutical formulation with controlled release of the freely water soluble low-dose active substance used for at the most once daily administration is disclosed. The active substance is maintained at a suitable therapeutic concentration in the blood throughout at least a 24 hour period independent of the physiological pH value to which the pharmaceutical formulation is exposed.
